

$$\boxed{} + \boxed{} = \boxed{}$$

$$\boxed{} - \boxed{} = \boxed{}$$

$$10 - \square = 8$$

$$\square - 5 = 4$$

$$6 - \square = 3$$

$$9 - \square = 5$$

$$\square - 2 = 8$$

$$11 - \square = 7$$

$$14 - \square = 7$$

$$\square - 5 = 11$$

$$\square - 4 = 8$$

$$20 - \square = 10$$

$$12 - \square = 10$$

$$\square - 0 = 6$$

$$12 - \square = 5$$

$$9 - \square = 3$$

$$\square - 9 = 14$$

$$18 - \square = 9$$

$$\square - 5 = 7$$

$$\square - 6 = 9$$

$$17 - \square = 11$$

$$15 - \square = 4$$

© I can use the facts I know to work out new facts (I know $5 + 3 = 8$ so I know $15 + 3 = 18$ and $95 + 3 = 98$ and I also know $50 + 30 = 80$)

I know

$$\boxed{} + \boxed{} = \boxed{}$$

So I know

$$\boxed{} + \boxed{} = \boxed{}$$

My start number is

I am counting

in steps of

The numbers are

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Pick numbers less than 10 for the bottom row.

Add the numbers together to make the total for the block above. Try to make different numbers in the top block,
